45 1.77	110 4.33	M 8	M 6	8.5 0.33	15 0.59	68 2.68	530 N 119 lbf

Dimensions in: millimeters / inches

**Specification**

**Magnet material**

NdFeB  
Neodymium, iron, boron  
Operating temperature up to 176 °F (80 °C)

**Steel part**

Zinc plated

**Sheathing**

Thermoplastic polyurethane (TPE)

- Black
- White
- Hardness ≈ 80 Shore A

- SW
- WS

RoHS

**On request**

- Other colors
- Other Shore hardnesses

**Accessory**

- GN 70 Magnet Holding Disks QVX
- GN 70.1 Self-Adhesive Disks QVX

The retaining magnets GN 57.3 with rubber jacket form a system together with the steel part that shields and strengthens the magnet, optimally concentrating the magnetic flux on the rubberized magnetic surface. The rubber protects sensitive surfaces from being damaged by the magnet and also delivers a high friction coefficient, resulting in high lateral displacement forces.
