Information

EN 600 straight adjustable levers are renowned for their style and ergonomic shape.

Like all adjustable levers, they are ideal whenever parts have to be clamped in a confined space or in a particular lever position. The insert is connected to the lever via serrations that can easily be disengaged.

Pulling the lever upwards disengages the serrations, allowing it to be swiveled to the ideal clamping position. When releasing the lever, the serrations automatically re-engage.

Resistant to solvents, oils, grease and other chemical agents.
