Specification

- Polyglass filled nylon, black

On request

- Additional inch and metric thread sizes

Information

SN 993 threaded tube ends support more weight than traditional brass insert tube ends, at a fraction of the cost. It's an easy and cost-effective way to attach leveling mounts and glides to the tubes and pipes commonly used to construct frames, conveyor bases and industrial machinery.

Use a plastic mallet or a similar tool, hammer the threaded tube end into the bottom of the tube and attach the mount.
