Specification

- Body
Nylon plastic
 - Glass filled
 - Black, matte finish
 - Temperature resistant up to 230 °F (110 °C)
- Socket cap screws DIN 912
Stainless steel AISI 304
- Hex nuts
Stainless steel AISI 316
- Adjustable lever
Glass fiber reinforced thermoplastic
Black
 - Insert / screw
Stainless steel AISI 303
 - Spring
Stainless steel AISI 301
- *Stainless Steel Characteristics* → page 2143
- **RoHS compliant**

Information

WN 600 two-way connector clamps are a very economical choice for your next design. Two-way connector clamps provide a simple, one-piece solution for applications that require height and width adjustments. One common connection piece (the two-way connector clamp) is used for mounting both a vertical and a horizontal rod through the two-way connector clamp holes (universal square and round), and they are secured via the socket cap screws. Typically used on conveyors, conveying systems and various types of equipment in the packaging, pharmaceutical, automation and material handling industries.
